Comments about [Bonito Generation](#) - Kero Kero Bonito

Quinthy

This sounds really good. Mastering is just perfect, not too loud or quiet with great energy. Pressing is better than most new records with very low noise floor. A couple very quick tics but nothing distracting. GZ media seems to be stepping up their game. I hope KKB do another pressing soon so everybody gets their chance. The packaging from the UK wasn't great(vinyl between two cardboard squares and a thin envelope around it), but enough to not cause damage.

EROROHALO

Packaging looks neat but mine had a massive crease :(

Maldarbaq

Mine too! Very disappointing but the record itself is great

Yggfyn

I'm fairly certain the label is supposed to say "Side one here / Side two there".Y'all think this is a

mispress and will be fixed on future pressings?

GAMER

The repress has the correct labeling: "Side one here / Side two there"

Bluddefender

Looks like it, as I have the same verbiage on my copy.

Gardall

The official KKB twitter says more vinyl pressings coming asap.

Kezan

hype(this is just so that I can post a comment)

Briciraz

Don't buy from this flipper they said they would be putting more up on the website

Xmatarryto

Lord please dont pay \$150 for this, the value of a product is measured by an active market, which this isn't. No one likes one who overcharges.
